

UNKA
SOUND SYSTEMS

The logo features the letters 'UNKA' in a bold, italicized, white-outlined font. Below it, the words 'SOUND SYSTEMS' are written in a smaller, italicized, white-outlined font. A thick, red, brushstroke-like underline is positioned below the text.

Unique Audio Solutions

FORCE *S3P*

Convenient to transport, simple to assemble and less cost, are not the only benefits of Unka Sound's unique technology.

We use the most durable and resistant materials when developing our products to protect and preserve the system regardless of the elements, making a Unka Sound installation reliable and durable.

We have the possibility to personalize your project, combining the system with any color from the RAL palette to help you better integrate the speakers in a wide variety of spaces.

Thanks to its reduced dimensions and weight and developed for arranging and storing three units vertically. In this way we reduce the necessary space in the sand, and of course, to be able to carry out transport and better manage the spaces in transport.

High Pressure, the subwoofer speakers have surround sound with a range from 30 Hz to 150 Hz, Ideal for small, medium or large spaces, where the audience is close to sound sources, such as nightclubs, dance floors dance and small live events such as efficiency in large arenas.

We created a complete portfolio of lightweight products that were easy to transport and quick to configure, optimizing logistics, space, labor and time.

Can be powered with external power or with FORCE S3A subwoofer

APPLICATIONS

Portable and installed AV systems.

Houses of worship: theaters, stadiums, concert halls, arenas, tour sound reinforcement.

Large-scale events

Optimization of our systems.

We have created several possibilities to arm our systems, according to the needs of our clients.

We are aware that we have clients who need to have absolute control over the system and clients who do not need this type of technology.

For this reason we have decided to create 2 FORCE S systems, with external control and without control getting closer to the customer.

FORCE S3P

Subwoofer of low weight and dimensions, equipped with an 18 "speaker of 1600w aes.

It can be powered by external electronics or from our FORCE S3A subwoofer, which It has a 2x3,000w power module, one channel for its own enclosure and the other channel to feed a FORCE S3P subwoofer.

With the DSP-4 module the customer can have an infinite capacity of resources in their hands as external control via network. The possibilities of total control and management is excellent. Control is done with Harmony Plus.

TECHNICAL SPECIFICATIONS FORCE S3P

General	
Type	Passive subwoofer
Transducers	1x 18" neodymium magnet woofer with 4" voice coil (1.600w power)
Frequency Response	30 Hz – 150 Hz (-6 dB)
Max. power	3.200 w
Maximum SPL	137 dB (peak)
Coverage	Omni

Controls and Connectivity	
Connectivity	Mains: 1x Speakon in 1x Speakon link

Handling	
Dimensions (WxHxD)	700 x 350 x 220 mm (27,5 x 13,78 x 8,66 in)
Weight	44 kg / 97 lb
