SOUND SYSTEMS

Unique Audio Solutions

FORCE X2P

Unique ratio of performance to size.

APPLICATIONS

Portable and installed AV systems.

Places of worship: theaters, stadiums, concert halls, arenas,

Sound reinforcement of the tour.

large scale events

DESCRIPTION

FORCE X2P is a passive box that can be used with external amplification or be a slave of the FORCE X2A model.

Optimization of our systems.

We have created several possibilities to assemble our systems, according to the needs of our clients.

We are aware that we have clients who need absolute control over the system and clients who do not need this type of technology.

For this reason we have decided to create 2 FORCE X2 systems, considering that their internal components are always the same, the only difference is power and control.

New addition of the new BASS control processor, which gives a sensation of expansion and a different sensation to other products with the minimum volume.

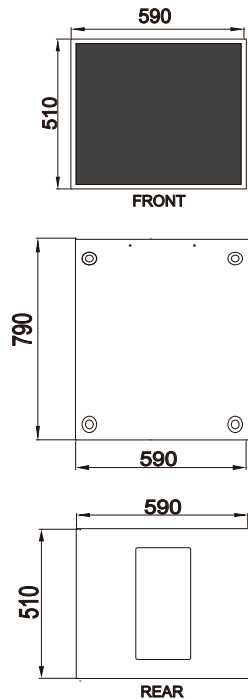

1.- FORCE X2A

It has a 2x1,100w power module, one channel for its own enclosure and the other channel to feed another FORCE X2P subwoofer. Without external control and with 4 presets.

2.- FORCE X2P

In this case, the X2P is a passive cabinet that can be used with amplification How to be exclamation of FORCE X2A.

TECHNICAL SPECIFICATIONS FORCE X2P

ACOUSTICS

SPEAKER HANDLING	1000w (SUB)
MAXIMUM AMPLIFIER POWER	2000w (SUB)
OPERATING FREQUENCY RANGE	30 Hz - 150 KHz +/- 3dB
MAXIMUM SPL	130 dB CONTINUOUS - 136 dB PEAK
SPL 1W / 1 MT	100 dB (SUB)

CROSSOVER
